PROFILE

Aspiring MERN/MERAN Stack Developer with foundational skills in MongoDB, Express.js, React, Angular, and Node.js. As a fresher, I'm eager to build scalable web applications that enhance user experience. Committed to learning new technologies and contributing to innovative projects through collaboration with cross-functional teams.

WORK EXPERIENCE

INTERNSHIP | Luminar Technolab | Kochi

JUNE 2024 - Present

PROJECTS

- KALAGRAHAM : Web-Application for Carnival Registration

Tools: PHP, MySQL, HTML, CSS, JavaScript

Developed an online platform allowing the public to register and book tickets for a carnival.
Key Modules:
Admin: Manage events, ticketing, and user data.
Artists: Register, showcase profiles, and manage performance schedules.
User: Register, book tickets, and view event details

PUBLICATIONS

- International journal of science and engineering development research

- IoT Applications in smart house and offices
